

# International Trade And Food Security Exploring Collective Food Security In Asia Nus Centre For International

Thank you extremely much for downloading **International Trade And Food Security Exploring Collective Food Security In Asia Nus Centre For International**. Maybe you have knowledge that, people have seen numerous times for their favorite books following this International Trade And Food Security Exploring Collective Food Security In Asia Nus Centre For International, but stop happening in harmful downloads.

Rather than enjoying a fine book once a cup of coffee in the afternoon, instead they juggled afterward some harmful virus inside their computer. **International Trade And Food Security Exploring Collective Food Security In Asia Nus Centre For International** is within reach in our digital library an online entrance to it is set as public as a result you can download it instantly. Our digital library saves in fused countries, allowing you to acquire the most less latency times to download any of our books as soon as this one. Merely said, the International Trade And Food Security Exploring Collective Food Security In Asia Nus Centre For International is universally compatible bearing in mind any devices to read.

**Wounded Planet** Henk A.M.J. ten Have 2019-05-14 Going beyond an individualized perspective, he poses audacious questions: What does it mean that patients are poor or uninsured and cannot afford suggested medicines? How can we deal with the air and water pollution that are producing a patient's illness? How do we respond to patients complaining about the safety and quality of drinking water in their neighborhood? Touching on infectious and noncommunicable diseases, as well as food, medicine, and water, *Wounded Planet* transcends the limited vision of mainstream bioethics to compassionately reveal how healthcare and medicine must take a broad perspective that includes the social and environmental conditions in which individuals live.

**Handbook of Agricultural Economics** 2022-06-24 *Handbook of Agricultural Economics, Volume Six* highlights new advances in the field, with this new release exploring comprehensive chapters written by an international board of authors who discuss topics such as The Economics of Food Loss and Waste, Empowering Communities Using an Integrated Design of Food Networks, Concentration in Food and Agricultural Markets, Agriculture and trade, Producers, Consumers, and Value Chains in Developing Countries, The Multiple Burdens of Malnutrition: Dietary Transition and Food System Transformation in Economic Development, Psychophysiological Measures and Consumer Food Choice, and The Economics of Health and Nutrition Related Food Policies: The Effects on the Public Health and Malnutrition. Presents the latest release in the *Handbook of Agricultural Economics* Written and contributed by leaders in the field Covers topics such as Economics on Food Loss and Waste, Integrated Design of Food Networks, Agriculture and Trade, and more

*Towards Sustainable Global Food Systems* Ruerd Ruben 2019-04-30 One of the major knowledge challenges in the domain of Resilient and Sustainable Food Systems refers to the integration of perspectives on consumption, patterns that support public health, inclusive value chains, and environmentally sustainable food production. While there is a long record of the analysis of separate interventions, this special issue generates integrated insights, provides cross-cutting perspectives, and outlines practical and policy solutions that address these global challenges. The collection of papers promotes the view that sustainable food systems require thorough insights into the structure and dynamics of agri-food production systems, the drivers for integrating food value chains and markets, and key incentives for supporting healthier consumer choices. On the production side, potential linkages between agricultural commercialization and intensification and their effects for food security and nutritional outcomes are analyzed. Value Chains are assessed for their contribution to improving exchange networks and markets for food products that simultaneously support efficiency, circularity, and responsiveness. Individual motives and market structures for food consumption need to be understood in order to be able to outline suitable incentives to enhance healthy dietary choice. The contributed papers focus on interfaces between food system activities and processes of adaptive change that are critical for overcoming key constraints and trade-offs between sustainable food and healthy diets.

**The Prospects of Common Concern of Humankind in International Law** Thomas Cottier 2021-05-13 The Common Concern of Humankind today is central to efforts to bring about enhanced international cooperation in fields including, but not limited to, climate change. This book explores the expression's potential as a future legal principle. It sets out the origins of Common Concern, its differences to other common interest legal principles, and expounds the potential normative structure and effects of the principle, applying an approach of carrots and sticks in realizing goals defined as a Common Concern. Individual chapters test the principle in different legal fields, including climate technology diffusion, marine plastic pollution, human rights enforcement, economic inequality, migration, and monetary and financial stability. They confirm that basic obligations under the principle of 'Common Concern of Humankind' comprise not only that of international cooperation and duties to negotiate, but also of unilateral duties to act to enhance the potential of public international law to produce appropriate public goods.

**Alternatives to Multilateralism** Lena Partzsch 2020-08-25 Analysis and case studies of emerging forms of private, public, and hybrid social and environmental governance. The effects of globalization on governance are complex and uncertain. As markets integrate, governments have become increasingly hesitant to enforce regulations inside their own jurisdictions. At the same time, multilateralism has proven unsuccessful in coordinating states' responses to global challenges. In this book, Lena Partzsch describes alternatives to multilateralism, offering analyses and case studies of emerging—alternative—forms of private, public, and hybrid social and environmental regulation. In doing so, she offers a unique overview of cutting-edge approaches to global governance. After laying the theoretical and empirical foundation of her argument, Partzsch presents three case studies from the countries most affected by these new forms of

governance. Drawing on primary documents, interviews, and participatory observations, she analyzes cotton supply chains and voluntary (private) cotton certification in Ethiopia; public supply-chain regulation of “conflict resources” from the Democratic Republic of the Congo; and hybrid governance of palm oil production in Indonesia. Partzsch finds that the new entanglement of public and private regulation fails to address social and environmental considerations in mainstream markets; argues that only in exceptional cases do alternative forms of regulation overcome the power asymmetries between actors in the consuming countries of the Global North and those in the producing countries of the Global South; and concludes that, while the paradigm of free trade fades, we must continue to develop viable alternatives in order to pursue collective norms of environmental sustainability and social justice.

**Exploring the New South American Regionalism (NSAR)** Ernesto Vivares 2016-04-15 The events and processes that have taken place in the last decade in South America have given way to one of the most interesting regional phenomena under a global crisis and within a changing world order. From the traditional status of Washington’s backyard and reign of economic and political stability, South America has increasingly turned into a region marked by a heterodox development in the light of other dominant regional tendencies of development—the European Union, NAFTA and the Asia Pacific. The political economic nature of the new South American regionalism (NSAR) is far from echoing the dominant interpretations about it, which reflects the major regional projects today. Given the reach and scope of the existing literature on the topic of the NSAR, there is an important gap concerning its academic exploration in relation to its nature of development, political economic complexity, challenges and orientations. In this sense, this book explores, from a wider and pluralist political economic perspective, the developmental dimensions of the NSAR within a changing hemispheric and world order in transformation. It analyses a set of specific debates: regionalism in the Americas then and now; social and economic development and regional integration; and organized crime, intelligence and defence. An in depth and critical reflection on the complex and heterogeneous path of regionalization taking place in South America from different perspectives and in key issues of regional development.

**Communicating Food in Korea** Jaehyeon Jeong 2021-03-15 An in-depth investigation of the complex relationships among food, culture, and society in Korea, *Communicating Food in Korea* presents diverse interpretations of food’s economic, political, and sociocultural relevance. Grounded in a variety of disciplines, the chapters research the ways food intersects with social issues in Korean society.

**Establishing Food Security and Alternatives to International Trade in Emerging Economies** Erokhin, Vasily 2017-07-13 The process of food production and distribution has grown into a global corporate system in recent years. This has caused significant impacts on sustainability on an international scale, particularly for developing nations. *Establishing Food Security and Alternatives to International Trade in Emerging Economies* is a pivotal reference source for the latest scholarly research on agricultural trade relations and trade liberalization in the context of developing countries. Highlighting a range of pertinent topics such as crop productivity, rural development, and value-added agriculture, this book is ideally designed for academics, researchers, graduate students, and practitioners interested in the current state of global food markets.

**International Law Reports** C. J. Greenwood 1988 The only publication wholly devoted to the regular and systematic reporting in English of decisions of international courts and arbitrators.

*Fishing for Human Perceptions in Coastal and Island Marine Resource Use Systems, 2nd Edition* Annette Breckwoldt 2019-06-07 Human perceptions, decision-making and (pro-) environmental behaviour are closely connected. This Research Topic focuses on bringing together perceptions and behaviour for sustainable coastal and island marine resource use systems. Management and governance of (large and small-scale) coastal marine resource use systems function in highly complex social and ecological environments, which are culturally embedded, economically interest-led and politically biased. Management processes therefore have to integrate multiple perspectives as well as perception-driven standpoints on the individual as well as the decision-makers’ levels. Consequently, the analysis of perceptions has developed not only as part of philosophy and psychology but also of environmental science, anthropology and human geography. It encompasses intuitions, values, attitudes, thoughts, mind-sets, place attachments and sense of place. All of these influence human behavior and action, and are collected or are available within the respective marine resource use system, which may support the livelihood of a large part of the local population. Management and governance are not only about mediating between resource use conflicts or establishing marine protected areas, they deal with people and their ideas and perceptions. Understanding the related decision-making processes on multiple scales and levels hence means much more than economically assessing the available marine resources or existing threats to the associated system. Over the past decade, there has been a growing inter- and transdisciplinary international community becoming interested in research which integrates perceptions of coastal and inland residents, local and regional stakeholder groups, as well as resource and environmental managers and decision-makers. By acknowledging the importance of the individual perspective and interest-led personal views, it became obvious how valuable and important these sources of information are for coastal research. An increase of research effort spent on the link between perceptions and behaviour in marine resource use systems is thus both timely and needed. By offering a diversity of inspiring and comprehensive contributions on the link between perceptions and behaviour, this Research Topic aspires to critically enlighten the discourse and applicability of such research for finding sustainable, locally identified, anchored and integrated marine resource use pathways.

**Research Anthology on Food Waste Reduction and Alternative Diets for Food and Nutrition Security** Management Association, Information Resources 2020-09-17 The world population is expected to increase exponentially within the next decade, which means that the food demand will increase and so will waste production. The increasing demand for food as well as changes in consumption habits have led to the greater availability and variety of food with a longer shelf life. However, there is a need for effective food waste management and food preservation as wasted food leads to overutilization of water and fossil fuels and increasing greenhouse gas emissions from the degradation of food. The *Research Anthology on Food Waste Reduction and Alternative Diets for Food and Nutrition Security* explores methods for reducing waste and cutting food loss in order to help the environment and support local communities as well as solve issues including that of land space. It also provides vital research on the development of plant-based foods, meat-alternative diets, and nutritional outcomes. Highlighting a range of topics such as agricultural production, food supply chains, and sustainable diets, this publication is an ideal reference source for policymakers, sustainable developers, politicians, ecologists, environmentalists, corporate executives, farmers,

and academicians seeking current research on food and nutrition security.

*Food, Power, and Resistance in the Andes* Alison Krögel 2010-12-16 Food, Power, and Resistance explores the ways in which artistic representations of food and cooks often convey subversive meanings that resist attempts to locate indigenous Andean and Quechua women in particular at the margins of power. This book offers a dynamic, interdisciplinary study of how food's symbolic and pragmatic meanings influence access to power and the possibility of resistance in the colonial and contemporary Andes.

*Global Environmental Politics* Gabriela Kutting 2010-09-13 Global Environmental Politics is the perfect introduction to this increasingly significant area. The text combines an accessible introduction to the most important environmental theories and concepts with a series of detailed case studies of the most pressing environmental problems. Features and benefits of the book: Explains the most important concepts and theories in environmental politics. Introduces environmental politics within the context of political science and international relations theories. Demonstrates how the concepts and theories apply in a wide variety of real world contexts. Case studies include the most important environmental issues from climate change and biodiversity to forests and marine pollution. Each chapter is written by an established international authority in the field. This exciting new textbook is essential reading for all students of environmental politics and will be of great interest to students of International Relations and Political Economy.

*Slow Growth and Rising Inequality* Sharon L. Holt 1999

**Global Tensions** Lourdes Beneria 2005-11-08 Against the backdrop of demonstrations in Seattle, Porto Alegre and Genoa and within the context of growing resistances to free trade and the current global trends, Global Tensions takes a close look at the challenges posed by the processes of globalization at the beginning of the twenty-first century. Composed of original essays by renowned scholars, this volume explores controversial topics such as free trade, women's rights, labor standards, the World Trade Organization and global tensions.

**International Trade and Development** 1972

*Trade in Water Under International Law* Fitzgerald Temmerman 2017-07-28 It is clear that more sustainable and efficient use of fresh water resources will become crucial in future global water management to avoid major threats to biological life. Trade in Water Under International Law offers a careful and well-reasoned introduction and analysis of this emerging and largely uncharted subject of international trade law, which has hitherto been of key importance in domestic law and policy, exploring the potential and limits of addressing the use of water resources in the context of World Trade Organization law.

**Culinary Nationalism in Asia** Michelle T. King 2019-07-11 With culinary nationalism defined as a process in flux, as opposed to the limited concept of national cuisine, the contributors of this book call for explicit critical comparisons of cases of culinary nationalism among Asian regions, with the intention of recognizing patterns of modern culinary development. As a result, the formation of modern cuisine is revealed to be a process that takes place around the world, in different forms and periods, and not exclusive to current Eurocentric models. Key themes include the historical legacies of imperialism/colonialism, nationalism, the Cold War, and global capitalism in Asian cuisines; internal culinary boundaries between genders, ethnicities, social classes, religious groups, and perceived traditions/modernities; and global contexts of Asian cuisines as both nationalist and internationalist enterprises, and "Asia" itself as a vibrant culinary imaginary. The book, which includes a foreword from Krishnendu Ray and an afterword from James L. Watson, sets out a fresh agenda for thinking about future food studies scholarship.

**Global Food Security** 2014

**The Oxford Handbook on The World Trade Organization** Amrita Narlikar 2012-05-31 The Oxford Handbook on the World Trade Organization provides an authoritative and cutting-edge account of the World Trade Organization. Its purpose is to provide a holistic understanding of what the WTO does, how it goes about fulfilling its tasks, its achievements and problems, and how it might contend with some critical challenges. The Handbook benefits from an interdisciplinary approach. The editorial team comprises a transatlantic partnership between a political scientist, a historian, and an economist. The distinguished and international team of contributors to the volume includes leading political scientists, historians, economists, lawyers, and practitioners working in the area of multilateral trade. All the chapters present original and state-of-the-art research material. They critically engage with existing academic and policy debates, and also contribute to the evolution of the field by setting the agenda for current and future WTO studies. The Handbook is aimed at research institutions, university academics, post-graduate students, and final-year undergraduates working in the areas of international organization, trade policy and negotiations, global economic governance, and economic diplomacy. As such, it should find an enthusiastic readership amongst students and scholars in History, Economics, Political Science, International Relations, Public Policy, and Law. Equally important, the book should have direct relevance for diplomats, international bureaucrats, government officials, and other policy-makers and practitioners in the area of trade and economic governance.

**United Nations Commission on International Trade Law (UNCITRAL) Yearbook 2014** United Nations Commission on International Trade Law 2019-06-27 This Yearbook is a compilation of all substantive documents related to the work of the Commission and its Working Groups. It also reproduces the annual Report of the Commission which is published as Supplement No. 17 of the "Official Records of the General Assembly". UNCITRAL is the core legal body of the United Nations system in the field of international trade law. It specializes in the modernization and harmonization of rules on international business.

**Subsidies in the Context of the WTO's Free Trade System** Gurwinder Singh 2017-09-04 This book analyses subsidies from various perspectives and creates a model that determines whether or not their use is justified. Further, it analyses the various causes of trade distortion, trade-discriminatory practices, and other issues associated with unregulated subsidies. In addition, the book considers how these issues fall within the scope of subsidies described under the SCM Agreement. The primary discussion from the perspective of WTO objective concerns the trade practice of awarding subsidies, for exports and also for protectionist purposes. Here, the terms justifiable and non-justifiable are used as hypothetical parameters to determine the extent of state support, considering the country classification based on economic and technological criteria, and their objectives for development. These parameters are distinct from Prohibited, Actionable, and Non-Actionable subsidies, as classified under the SCM Agreement. Subsidies awarded for the purposes of development and for welfare are considered as justifiable, whereas subsidies for the promotion of exports or state measures adopted for protectionist purposes are non-

justifiable. Lastly, the book addresses the implications of such subsidies on the core objectives of the WTO and in connection with fair trade values.

**Exploring the human rights-based approach in the context of the implementation and monitoring of the SSF Guidelines** Food and Agriculture Organization of the United Nations 2018-11-09 The SSF Guidelines are based on internationally accepted human rights standards and are to be interpreted and implemented in accordance with those standards. Their objectives are to be met through the promotion of a human rights-based approach (HRBA). This approach seeks to ensure the participation of small-scale fishing communities in non-discriminatory, transparent and accountable decision-making processes by putting particular emphasis on the needs of vulnerable and marginalized groups and developing countries. While the HRBA has been recognized by FAO as a principle that informs the design, implementation, monitoring and evaluation of programmes and projects,<sup>1</sup> there is still limited experience in its practical application in the context of small-scale fisheries (SSF). It is therefore important to explore how the approach could support the implementation and monitoring of the SSF Guidelines. Accordingly, the workshop on “Exploring the human rights-based approach in the context of the implementation and monitoring of the SSF Guidelines” explored what the human rights-based approach means within the context of small-scale fisheries in general and the thematic areas covered by the SSF Guidelines in particular. It discussed what the HRBA entails in terms of the conduct of the various state and non-state actors to whom the SSF Guidelines are addressed as well as the needs of the different stakeholders in the various policy areas, with a view to developing guidance materials for the application of the HRBA in the implementation and monitoring of the SSF Guidelines.

**Handbook of Water Resources Management: Discourses, Concepts and Examples** Janos J. Bogardi 2021-06-12 This book provides an overview of facts, theories and methods from hydrology, geology, geophysics, law, ethics, economics, ecology, engineering, sociology, diplomacy and many other disciplines with relevance for concepts and practice of water resources management. It provides comprehensive, but also critical reading material for all communities involved in the ongoing water discourses and debates. The book refers to case studies in the form of boxes, sections, or as entire chapters. They illustrate success stories, but also lessons to be remembered, to avoid repeating the same mistakes. Based on consolidated state-of-the-art knowledge, it has been conceived and written to attract a multidisciplinary audience. The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi-level decision making processes. Knowing more about water, but also about concepts, methods and aspirations of different professional, disciplinary communities and stakeholders professionalizes the debate and enhances the decision making.

**Ethical Trade, Gender and Sustainable Livelihoods** Kiah Smith 2014-03-21 Fair and ethical trade is often criticized for being highly gendered, and for institutionalizing the ethical values of consumers, the priorities of NGOs and governments, and most of all, food retailers. But little is known about how women smallholder farmers experience diverse ethical standards, or whether and how standards reflect their values, local cultural and environmental contexts, or priorities for achieving sustainable livelihoods. Linking gender, smallholder livelihoods and global ethical trade regulations, this book reveals that multiple understandings of social justice, environmental sustainability and well-being – or ethicality – exist in parallel to those institutionalized in ethical trade schemes. Through an in-depth case study of smallholder subsistence and French bean farming in Kenya, the book grounds the analysis of livelihoods, gender and ethical trade in women smallholders’ perspectives, links the macro level of markets with the micro level of livelihoods, and engenders relations of power, structure and agency in food networks. It brings together disparate bodies of theory to illustrate the knowledge, strategies and values of women smallholder farmers that are often beyond the scope of ethical trade regulations. It also provides a challenging new vision for doing food systems research.

**Food Security and Nutrition** Charis Michel Galanakis 2020-10-17 Food and nutrition security - identified via availability, access, utilization, and stability - and transitions to sustainable food systems are major discourses in the agro-food arena, as many countries today experience different forms of malnutrition simultaneously, such as child undernutrition, anemia among women, and adult obesity. Meanwhile, the triple burden of malnutrition (undernutrition, overnutrition, and micronutrient deficiency) is still widespread. Food Security and Nutrition explores integrated, context-specific approaches to food security challenges, emphasizing nutrition security as an integral component and addressing the implications of food content to food and nutrition security policies. Providing insight into these challenges through agricultural, policy, nutritional, geographic and sustainability lenses, Food Security and Nutrition is a valuable reference for food scientists and nutrition researchers working in food supply, food security, and nutrition security, and policy makers, investors, and other decision-makers seeking to address food insecurity around the world. Addresses nutrition security as part of the overall challenge of food security Explores contributing factors that impact both food and nutrition security Presents insights into effective policy development and implementation

*Revolutions in International Law* Kathryn Greenman 2021-02-28

**Food Security Issues in the Arab Near East** A. A. El-Sherbini 2016-01-22 Food Security Issues in the Arab Near East discusses the condition that agricultural production has not kept up with the increasing food demand. Increased demand has stem from population explosion and the growth of incomes in the oil exporting countries. The book addresses this Arab food security crisis. First part of the volume reviews short-term considerations to increase food production in chosen countries of the region. They cover technical and socio-economic parameters which could give favourable short term effect on agricultural production. These parameters are crop insurance, simple agronomic practice, economic incentives, and price policies. Second part concentrates on food security planning. The subject of this section is the risks involved with rain-fed production. The problems arise when rainfall becomes rare and crops dried up. Last part of the book details the Arab trade in agricultural commodities and its effect for regional food security. The book will provide useful information to sectors that are concerned with agriculture production and improvement.

**Finance or Food?** Hilde Bjorkhaug 2020-01-29 Exploring the ways in which culture, systems of value, and ethics impact agriculture, this volume addresses contemporary land questions and conditions for agricultural land management. Throughout, the editors and contributors consider a range of issues, including pressure on farmland, international and global trade relations, moral and ethical questions, and implications for governance. The focus of Finance or Food? is land use in Australia, Canada, and Norway, chosen for their commonalities

as well as their differences. With reference to these specific national contexts, the contributors explore political, ecological, and ethical debates concerning food production, alternative energy, and sustainability. The volume argues that recognition of food, finance, energy, and climate crises is driving investments and reframing the strategies of development agencies. At the same time, food producers, small farmers, and pastoralists facing eviction from their land are making their presence felt in this debate, not just locally, but in national policy arenas and international fora as well. This volume investigates the many ways in which this process is occurring and draws out the cultural implications of new developments in global land use. An important intervention into a timely debate, *Finance or Food?* will be essential reading for both academics and policymakers.

*The State of Agricultural Commodity Markets 2018* Food and Agriculture of the United Nations 2018-09-18 Global agricultural trade has increased significantly in value terms since 2000. Its pattern has also changed – emerging economies and developing countries play a bigger role in international markets, and South–South agricultural trade has expanded significantly. Climate change is expected to affect agriculture, food security and nutrition unevenly across countries and regions. Changes in comparative advantage in agriculture around the world will also affect international trade. This edition of *The State of Agricultural Commodity Markets* focuses on the complex and underexplored intersection between agricultural trade, climate change and food security. The report makes an important contribution to the policy debates on climate change adaptation and mitigation under the Paris Agreement and the multilateral agricultural trade rules. The report discusses policies – both domestic support and trade measures – that can promote food security, adaptation and mitigation, and improve the livelihoods of family farmers around the world. Given both the slow- and rapid-onset impacts of climate change, policies that can significantly promote climate change adaptation and mitigation would benefit from deeper discussions in international fora on how to strengthen the mutually supportive role of trade rules and climate interventions.

**Report of the Seminar on the Follow-up to the World Food Summit : Sharing Information and Experiences Among Pacific Island Countries in Translating the World Food Summit Plan of Action Into National Plans of Action, FAO Conference Room, Apia, Samoa 6-9 April 1999** 1999

Exploring and Optimizing Agricultural Landscapes Lothar Mueller 2021-06-14 The book informs about agricultural landscapes, their features, functions and regulatory mechanisms. It characterizes agricultural production systems, trends of their development, and their impacts on the landscape. Agricultural landscapes are multifunctional systems, coupled with all nexus problems of the 21st century. This has led to serious discrepancies between agriculture and environment, and between urban and rural population. The mission, key topics and methods of research in order to understanding, monitoring and controlling processes in rural landscapes is being explained. Studies of international expert teams, many of them from Russia, demonstrate approaches towards both improving agricultural productivity and sustainability, and enhancing ecosystem services of agricultural landscapes. Scientists of different disciplines, decision makers, farmers and further informed people dealing with the evolvement of thriving rural landscapes are the primary audience of this book.

Index of Economic Articles in Journals and Collective Volumes 2003

*The South China Sea Arbitration* S. Jayakumar 2018-10-26 Bringing together leading experts on the law of the sea, *The South China Sea Arbitration* provides a detailed analysis of the significant aspects, findings and legal reasoning in the high-profile case of the South China Sea Arbitration between the Philippines and China. The book offers a comprehensive overview and analysis of the major issues discussed in the Arbitration including jurisdiction, procedure, maritime entitlement, and the protection of the marine environment. The chapters also explore the implications of the case for the South China Sea disputes and possible dispute settlements under the 1982 United Nations Convention on the Law of the Sea. The robust discussion in each chapter will be an invaluable contribution to the ongoing debate on the South China Sea Arbitration. This informative and compelling book will be essential reading for scholars and students of public international law, law of the sea, international dispute settlement and international relations. Policy makers and governmental officials with responsibility for law of the sea and international dispute settlement, as well as members of international courts and tribunals, international organisations and non-governmental organisations, will find this book a stimulating read.

*The Pan-African Imperative* Michael Williams 2021-11-15 This book argues that the principles of Pan-Africanism are more important than ever in ensuring the liberation of the people Africa, those at home and abroad, and the rapid development of the African continent. The writings and practice of Osagyefo Dr. Kwame Nkrumah, Ghana's first post-independence prime minister and president, were key in laying out a vision for post-independence Africa. Now, in an effort to counter the deluge of neo-liberal thinking that has engulfed so much of the debate on African development in recent decades, Michael Williams illuminates just how important a role an Nkrumaist intellectual framework can play in providing an accurate diagnosis of, and effective solution to, Africa's development crisis. This is done by examining Nkrumah's vision of the critical role Pan-Africanism must play in the development of the continent. Raising vitally important questions about Africa's development and the quality of life of its populations, this book will be a key text for researchers of African politics, development studies, and the Pan-African movement.

Principles-Focused Evaluation Michael Quinn Patton 2017-09-28 How can programs and organizations ensure they are adhering to core principles--and assess whether doing so is yielding desired results? From evaluation pioneer Michael Quinn Patton, this book introduces the principles-focused evaluation (P-FE) approach and demonstrates its relevance and application in a range of settings. Patton explains why principles matter for program development and evaluation and how they can serve as a rudder to navigate the uncertainties, turbulence, and emergent challenges of complex dynamic environments. In-depth exemplars illustrate how the unique GUIDE framework is used to determine whether principles provide meaningful guidance (G) and are useful (U), inspiring (I), developmentally adaptable (D), and evaluable (E). User-friendly features include rubrics, a P-FE checklist, firsthand reflections and examples from experienced P-FE practitioners, sidebars and summary tables, and end-of-chapter application exercises. ÿ

*The Legal Authority of ASEAN as a Security Institution* Hitoshi Nasu 2019-04-30 Provides a fresh perspective on ASEAN's role for regional security in Southeast Asia.

International Trade and Food Security Michael Ewing-Chow 2016-01-29 Food security is one of the greatest challenges of our time. The food price crisis of 2008 exposed the vulnerabilities of the global food system. Governments across Asia exacerbated the crisis by imposing

export restrictions based on a policy of self-sufficiency. This book assesses whether self-sufficiency is an adequate response to the food security challenges we face. Pricing volatility drives isolationism at a time when climate change and increasingly uncertain weather patterns make it difficult for any single nation to guarantee adequate food production for itself. Through a collection of commissioned studies which draw upon the experience of leading experts and scholars in trade, investment, law, economics, and food policy, this book analyses the impact of this trend on the most essential crop in the Asian region - rice. It suggests that food security policy should be reconceptualised: from the national to the regional and even the global level. It also provides its own proposals as to how this new paradigm of collective food security should be understood and developed. The book calls for a new conversation in the region, acknowledging that the challenges we face are global and the solutions must be found in collective action. This state-of-the-art study will appeal to lawyers, economists and political scientists, as well as food security specialists by providing expert analyses and enlightening solutions for the future.

*Environmental Resilience and Food Law* Gabriela Steier 2019-08-13 Agrobiodiversity and agroecology go hand-in-hand in promoting environmental resilience in international food systems as well as climate change resilient food policy. This book contextualizes how various legal frameworks address agrobiodiversity and agroecology around the globe and makes it accessible for audiences of students, practitioners, educators, and scholars. Some chapters focus on the legal regulation of agroecology from a food law perspective. Others are geared toward providing regulators, lawmakers and attorneys with the scientific and policy background of those concepts, so that they are equipped in the field of food law in everyday practice and policy. Climate change dimensions of the issues are woven throughout the book.

**Encyclopedia of Food Security and Sustainability** 2018-11-08 The Encyclopedia of Food Security and Sustainability covers the hottest topics in the science of food sustainability, providing a synopsis of the path society is on to secure food for a growing population. It investigates the focal issue of sustainable food production in relation to the effects of global change on food resources, biodiversity and global food security. This collection of methodological approaches and knowledge derived from expert authors around the world offers the research community, food industry, scientists and students with the knowledge to relate to, and report on, the novel challenges of food production and sustainability. This comprehensive encyclopedia will act as a platform to show how an interdisciplinary approach and closer collaboration between the scientific and industrial communities is necessary to strengthen our existing capacity to generate and share research data. Offers readers a 'one-stop' resource on the topic of food security and sustainability Contains articles split into sections based on the various dimensions of Food Security and Food Sustainability Written by academics and practitioners from various fields and regions with a "farm to fork understanding Includes concise and accessible chapters, providing an authoritative introduction for non-specialists and readers from undergraduate level upwards, as well as up-to-date foundational content for those familiar with the field
