Estuarine ScienceJohn E. Hobbie 2000 This book is organized into five parts reflecting major topics in estuarine synthesis: prediction of inputs from drainage basins; coupling of physical and ecological factors; links between biogeochemistry and food webs; controls of estuarine habitats; and the role of synthesis in addressing issues of management. Each part contains an introductory plenary talks illustrating case histories of successful syntheses; and a workshop report presenting an overview of the topic, goals for further synthesis, and recommendations about knowledge, and models necessary to attain these goals.

[IGY Calendar Record: Ozone Instruction Manual](#)1988
Various indices and highlights of the solar, geophysical and associated events which took place during the IGY, a period of intensified observation of the earth and its environment. This book is organized into two main parts encompassing six chapters. The first part describes the features of the charts and tables in this Calendar Record of the IGY. The Supplementary Tables are a series of indices of world-wide auroral observations which could not conveniently be adapted to the Calendar Record itself. They also summarize for historical purposes the end product of the IGY Days Program, namely the Calendar of Regular World Days and Intervals decided on before the IGY began and the declarations of Solar Alerts and Special World Intervals. The second part considers the determination of some constants used in the calculation of the amount of ozone from spectrophotometer measurements and an analysis of the accuracy of the results. This value is of value to geophysicists and researchers.
