Circulation Services in a Small Academic Library Connie Battaile 1992 In a library, circulation is the process of lending books to borrowers and accurately reshelving them after they have been returned so that they will be retrievable by the next user. This basic cycle has many elaborations and sub-cycles attached to it, such as those for overdues and holds, the record-keeping process, and the reserve book operation. These sub-cycles vary from library to library, but the basic cycle remains the same in every library that allows patrons to remove books. Connie Battaile provides a detailed volume written for those new to the circulation department of small academic libraries. The author presents not the definitive way to run a circulation department, but rather she provides a variety of possible methods. Because the circulation department is the main public contact point, many library housekeeping chores are assigned to it. Again, these additional responsibilities vary from library to library, but the author provides various procedures. The physical environment of the department and the stacks, the staff, effective communications, and scheduling are covered in full detail.

Flood and Coastal Erosion Risk Management Edmund Penning-Rowsell 2014-01-03 A new 'Multi-Coloured Manual' This book is a successor to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management, produced by the Flood Hazard Research Centre at Middlesex University, UK, with support from Defra and the Environment Agency. It builds upon a previous book known as the "multi-coloured manual" (2005), which itself was a synthesis of the blue (1977), red (1987) and yellow manuals (1992). As such it expands and updates this work, to provide a manual of assessment techniques of flood risk management benefits, indirect benefits, and coastal erosion risk management benefits. It has three key aims. First it provides methods and data which can be used for the practical assessment of schemes and policies. Secondly it describes new research to update the data and improve techniques. Thirdly it explains the limitations and complications of Benefit-Cost Analysis, to guide decision-making on investment in river and coastal risk management schemes. STAR 1968-07

De zwakste schakel Elyyahu Goldratt 2012-11-06 Elyyahu Goldratt is wereldberoemd geworden door de bestseller Het doel, waarin hij zijn Theory of Constraints (beperkingentheorie) uitlegt in romanvorm. In De zwakste schakel verlegt hij deze theorie naar het projectmanagement. Deze inspirerende businessroman laat zien hoe je projecten in veel minder tijd kunt afronden, binnen het budget en zonder concessies te doen aan kwaliteit of functionaliteit. Krachtige technieken zorgen ervoor dat projectmanagers ook bij problemen gefocust blijven zodat de gewenste resultaten worden behaald. De zwakste schakel is een belangrijk boek voor iedereen die dagelijks de uitdaging aangaat om innovatieve, nieuwe producten of diensten te leveren. Iedereen die geen exemplaar van dit boek weet te bemachtigen, mist een fantastische kans om zich zowel zakelijk als persoonlijk te ontwikkelen. Assembly Elyyahu Goldratt is bij miljoenen lezers een begrip als

wetenschapper, leermeester en managementgoeroe. Over de hele wereld passen economen, bedrijfskundigen en managers zijn gedachtegoed toe in hun eigen organisaties.

Information Theory and Best Practices in the IT Industry Sanjay Mohapatra 2012-02-21 ???The importance of benchmarking in the service sector is well recognized as it helps in continuous improvement in products and work processes. Through benchmarking, companies have strived to implement best practices in order to remain competitive in the product-market in which they operate. However studies on benchmarking, particularly in the software development sector, have neglected using multiple variables and therefore have not been as comprehensive. Information Theory and Best Practices in the IT Industry fills this void by examining benchmarking in the business of software development and studying how it is affected by development process, application type, hardware platforms used, and many other variables. Information Theory and Best Practices in the IT Industry begins by examining practices of benchmarking productivity and critically appraises them. Next the book identifies different variables which affect productivity and variables that affect quality, developing useful equations that explaining their relationships. Finally these equations and findings are applied to case studies. Utilizing this book, practitioners can decide about what emphasis they should attach to different variables in their own companies, while seeking to optimize productivity and defect density.

Het doel Eliyahu M. Goldratt 2012-10-16 Al dertig jaar een internationale managementbestseller! Het doel heeft het managementdenken in de westerse wereld veranderd. Goldratt werd door het tijdschrift Fortune uitgeroepen tot 'goeroe van de industrie'. Door Business Week uitgeroepen tot 'genie'. In een spannend detectiveverhaal vecht Alex Rogo voor het behoud van zijn bedrijf. Met hulp van een oud studievriend slaagt hij erin om conventionele denkwijzen aan de kant te schuiven. Op deze manier handelt hij op een originele manier. Elk proces blijkt beperkingen te hebben die echte groei en ontwikkeling belemmeren. Het verhaal verklaart de basisprincipes van de beperkingentheorie. Dit is de Theory of Constraints, ontwikkeld door Eliyahu Goldratt. Al meer dan zes miljoen exemplaren wereldwijd verkocht! Eliyahu Goldratt is bij miljoenen lezers een begrip als wetenschapper, leermeester en managementgoeroe. Over de hele wereld passen economen en managers zijn gedachtegoed toe in hun eigen organisaties.

Mechanical Circulatory Support in End-Stage Heart Failure Andrea Montalto 2017-07-14 This book is a detailed practical guide to the use of ventricular assist devices and total artificial hearts to provide mechanical circulatory support (MCS) in patients with end-stage heart failure. It explains why MCS may be indicated, which patients require MCS, when and how to implant ventricular assist devices or a total artificial heart, and how to avoid potential complications of MCS. Management throughout the period of care is described, from preimplantation to follow-up, and both typical and atypical cases are discussed. The text features numerous helpful tips and tricks relating to surgical and nonsurgical management and is supported by a wealth of high-quality illustrations that document the preoperative evaluation and implantation techniques. Heart transplantation remains the gold standard for the treatment of patients suffering from end-stage heart failure, but the shortage of donors has led to an increase in the use of MCS. This book will assist all physicians, and especially cardiologists and anesthesiologists, who are involved in the care of these patients.

Manual of Simulation in Healthcare Richard H. Riley 2008 Medical simulation is a relatively new science that is achieving respectability among healthcare educators worldwide. Simulation and skills centres have become established to integrate simulation into mainstream education in all medical, nursing, and paramedical fields. Borrowing from the experience and methodologies of industries that are using simulation, medical educators are grappling with the problem of rapidly acquiring the skills and techniques required to implement simulation programmes into established curricula. This book assists both novice and experienced workers in the field to learn from established practitioners in medical simulation. Simulation has been used to enhance the educational experience in a diverse range of fields; therefore a wide variety of disciplines are represented. The book begins with a section on the logistics of establishing a simulation and skills centre and the inherent problems with funding, equipment, staffing and course development, and promotion. Section two deals with simulators and related training devices that are required to equip a stand-alone or institution-based centre. The features, strengths, and weaknesses of training devices are presented to help the reader find the appropriate simulator to fulfil their training requirements. There is a guide to producing scenarios and medical props that can enhance the training experience. The third section covers adult education and it reviews the steps required to develop courses that comply with 'best practice' in medical education. Teaching skills, facilitating problem-based learning groups and debriefing techniques are especially important to multidisciplinary skills centres that find themselves becoming a centre for medical education. The manual concludes with guides for the major specialties that use simulation, including military, paediatrics, CPR and medical response teams, obstetrics, and anaesthesia.

Het is geen toeval Eliyahu Goldratt 2012-10-09 Alex Rogo heeft een prima jaar achter de rug: hij werd benoemd tot tweede man op divisieniveau van UniCo en is verantwoordelijk voor drie onlangs geacquireerde bedrijven. Hij ziet de toekomst met vertrouwen tegemoet. Dan komt de raad van bestuur met een beleidswijziging. Er is cash nodig en Alex? bedrijven worden in de etalage gezet. Een vreselijk dilemma voor Alex. Als hij de reorganisatie van zijn bedrijven succesvol afrondt, kunnen ze met maximale winst worden verkocht. Als hij daar niet in slaagt, gaan ze dicht. In beide gevallen zijn Alex en zijn medewerkers hun baan kwijt. En alsof dat nog niet genoeg is: zijn twee kinderen zijn tieners geworden! De bestseller Het Doel speelt in een tijd waarin bottlenecks in de capaciteit de resultaten bepalen. In het vervolg Het is geen toeval zien we het tegenovergestelde: er is capaciteit te over. Ook het verkopen van deze capaciteit tegen lagere prijzen biedt niet voldoende soelaas meer. Alleen doorbraakideeën kunnen nog helpen. Het is geen toeval werkt een drietal van dergelijke ideeën uit. Eliyahu M. Goldratt is een van de meest vooraanstaande managementfilosofen en wordt internationaal erkend als baanbreker in de ontwikkeling van nieuwe managementconcepten en -systemen.

The Entrepreneurial Solution to Poverty and the Science of What is Possible Fiet, James O. 2022-07-19 Engaging and accessible, The Entrepreneurial Solution to Poverty and the Science of What is Possible examines the systematic practice of poverty alleviation. Using the science of informational economics (IE), based on leveraging specific information, as well as decades' worth of experimental evidence, James Fiet demonstrates how poverty may be mitigated through entrepreneurial practices.

Maintenance, Safety, Risk, Management and Life-Cycle Performance of Bridges Nigel Powers 2018-07-04 Maintenance, Safety, Risk, Management and Life-Cycle Performance of Bridges contains lectures and papers presented at the Ninth International Conference on Bridge Maintenance, Safety and Management (IABMAS 2018), held in Melbourne, Australia, 9-13 July 2018. This volume consists of a book of extended abstracts and a USB card containing the full papers of 393 contributions presented at IABMAS 2018, including the T. Y. Lin Lecture, 10 Keynote Lectures, and 382 technical papers from 40 countries. The contributions presented at IABMAS 2018 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of bridge maintenance, safety, risk, management and life-cycle performance. Major topics include: new design methods, bridge codes, heavy vehicle and load models, bridge management systems, prediction of future traffic models, service life prediction, residual service life, sustainability and life-cycle assessments, maintenance strategies, bridge diagnostics, health monitoring, non-destructive testing, field testing, safety and serviceability, assessment and evaluation, damage identification, deterioration modelling, repair and retrofitting strategies, bridge reliability, fatigue and corrosion, extreme loads, advanced experimental simulations, and advanced computer simulations, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of more rational decision-making on bridge maintenance, safety, risk, management and life-cycle performance of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems, including students, researchers and engineers from all areas of bridge engineering.
