The book: - Offers practical and rich illustrations of teachers' and children's work based on international research that integrates theory with practice; - Brings a critical lens to arts education; - Includes summaries, reflective questions, and recommended further readings with every chapter. *Young Children, Pedagogy and the Arts* provides a more nuanced understanding of the arts through an exploration of specific instances in which committed teachers and researchers are discovering what contemporary multimodal tools offer to young children. The Forbidden Zone 1940 Anne Angelo 2022-05-16 This is a continuation of the story of Anne Angelo, as published in the companion book: *A Sprig of White Heather and a Scottish Lass*. It is a heart-warming story that completely justifies the researching and writing. It demonstrates how inexorably lives can be shaped and directed by the

circumstances of birth and the environment in which the formative years are spent. Born in Invergordon, Ross-shire, in the Highlands of Scotland, to parents utter opposites in cultural and social backgrounds, education, heredity, and race—and further, tragically, in conflict since the very day of their wedding—her world until the age of twenty was one of hatred and heartbreak, fear, and disillusionment and despair. Released at that age, by entirely fortuitous circumstances over which she had no control, she enjoyed a period of blissful living in France. The coming of the War brought an end to that. The actions of the German Forces of Occupation against her drove her into her activities with the French Resistance. It was inevitable she would be betrayed. She was forced to flee to the only place where she could be sure enemy agents could not reach her—her father's house in the Scottish Highlands, where the security for the old naval base was still effective, but where she had no protection from her father's wiles and hostile intentions. In many ways, her story outdoes that of Hatter's Castle. Clinging to the slender thread of the love she found in France, she endures. Until the sun shines and, in a surprising revelation, shows that motives and intents are not always what they are thought to be.

In the Zone Mike Lansdown 2020-04-06 At a time when test and examination results still dominate the educational landscape, there is a need to focus on, and support teachers with, the real meaning and purpose of learning. In the Zone concerns itself with important aspects of learning that are not always prominent in government policy and legislation. In particular it argues that challenge is an essential element of true learning, without which there can be no progress. It brings together supportive materials aimed at encouraging teachers to reflect on their present practice, take sensible risks with their teaching, and understand the importance of enjoyment and engagement for both teachers and pupils. Importantly, the book is fully up to date with the new Ofsted Education Inspection Framework and current thinking around positive pupil mental health.

The Rise and Fall of American Science Fiction, from the 1920s to the 1960s Gary Westfahl 2019-10-04 □ By examining important aspects of science fiction in the twentieth century, this book explains how the genre evolved to its current state. Close critical attention is given to topics including the art that has accompanied science fiction, the subgenres of space opera and hard science fiction, the rise of SF anthologies, and the burgeoning impact of the marketplace on authors. Included are in-depth studies of key texts that contributed to science fiction's growth, including Philip Francis Nowlan's first Buck Rogers story, the first published stories of A. E. van Vogt, and the early juveniles of Isaac Asimov, Arthur C. Clarke and Robert Heinlein.

A Deepness in the Sky Vernor Vinge 2000-01-15 After thousands of years searching, humans stand on the verge of first contact with an alien race. Two human groups: the Qeng Ho, a culture of free traders, and the Emergents, a ruthless society based on the technological enslavement of minds. The group that opens trade with the aliens will reap unimaginable riches. But first, both groups must wait at the aliens' very doorstep for their strange star to relight and for their planet to reawaken, as it does every two hundred and fifty years.... Then, following terrible treachery, the Qeng Ho must fight for their freedom and for the lives of the unsuspecting innocents on the planet below, while the aliens themselves play a role unsuspected by the Qeng Ho and Emergents alike. More than just a great science fiction adventure, *A Deepness in the Sky* is a universal drama of courage, self-discovery, and the redemptive power of love. *A Deepness in the Sky* is a 1999 Nebula Award Nominee for Best Novel and the winner of the 2000 Hugo Award for Best Novel.

Posthumanism in Art and Science Giovanni Aloï 2021-09-28 Posthumanism synthesizes philosophical, literary, and artistic responses to technological advancements, globalization, and mass extinction in the Anthropocene. It asks what it can mean to be

human in an increasingly more-than-human world that has lost faith in the ideal of humanism, the autonomous, rational subject, and it models generative alternatives cognizant of the demands of social and ecological justice. Amid rising social justice movements, collapsing economic structures, and the dwindling power of cultural institutions, posthumanism advances thinking on new and previously unenvisionable challenges. *Posthumanism in Art and Science* is an anthology of indispensable statements and artworks that provide an unprecedented mapping of this intellectual and aesthetic development in a global context. It features groundbreaking theorists including Donna Haraway, Rosi Braidotti, Mel Y. Chen, Michael Marder, Alexander Weheliye, Anna Tsing, Timothy Morton, N. Katherine Hayles, Bruno Latour, Francesca Ferrando, and Cary Wolfe, as well as innovative, influential artists and curators such as Yvonne Rainer, Skawennati, Chus Martínez, William Wegman, Nandipha Mntambo, Cassils, Pauline Oliveros, and Doo-sung Yoo. These provocative and compelling works, including previously unpublished interviews and essays, speak to the ongoing conceptual and political challenge of posthumanist thinking in a time of unprecedented cultural and environmental crises. An essential primer and reference for educators, students, artists, and art enthusiasts, this volume offers a powerful framework for rethinking anthropocentric certitudes and reenvisioning equitable and sustainable futures.

Child Psychology and Pedagogy Maurice Merleau-Ponty 2010-06-30 Maurice Merleau-Ponty is one of the few major phenomenologists to engage extensively with empirical research in the sciences, and the only one to examine child psychology with rigor and in such depth. His writings have recently become increasingly influential, as the findings of psychology and cognitive science inform and are informed by phenomenological inquiry. Merleau-Ponty's Sorbonne lectures of 1949 to 1952 are a broad investigation into child psychology, psychoanalysis, pedagogy, phenomenology, sociology, and anthropology. They argue that the subject of child psychology is critical for any philosophical attempt to understand individual and intersubjective existence. Talia Welsh's new translation provides Merleau-Ponty's complete lectures on the seminal engagement of phenomenology and psychology.

Welcoming Young Children into the Museum Sarah Erdman 2021-11-30 *Welcoming Young Children into the Museum* provides all of the information practitioners need to consider when making the decision to engage with this audience and their carers. Meeting the reader where they are, this guide enables professionals to work toward outcomes that fit with their needs. Working methodically from the initial stages of bringing staff on board, through to implementation and evaluation, readers are carefully steered through each phase. "Big-picture" needs, like adherence to mission, are

considered alongside logistical components, like cleaning schedules, to ensure that museums cater to young children in a way that is beneficial to both the visitors and the institution. Drawing on current neurological research and best practices in early childhood education and development, this guide presents case studies from a variety of different institutions around the world that demonstrate that creating interesting, developmentally appropriate opportunities for young children is about much more than just simplifying what is already on offer. Erdman, Nguyen and Middleton demonstrate that the age and needs of the visitors must be taken into careful consideration, as well as the assets and potential obstacles of the institution. *Welcoming Young Children into the Museum* will be essential reading for professionals working in museums large and small, regardless of type. It will be useful to those who are considering setting up new programmes for early years audiences and those with existing programmes, who would like to improve their offering.

Saving the Children Emily Baughan 2021-11-23 *Saving the Children* analyzes the intersection of liberal internationalism and imperialism through the history of the humanitarian organization Save the Children, from its formation during the First World War through the era of decolonization. Whereas Save the Children claimed that it was "saving children to save the world," the vision of the world it sought to save was strictly delimited, characterized by international capitalism and colonial rule. Emily Baughan's groundbreaking analysis, across fifty years and eighteen countries, shows that Britain's desire to create an international order favorable to its imperial rule shaped international humanitarianism. In revealing that modern humanitarianism and its conception of childhood are products of the early twentieth-century imperial economy, *Saving the Children* argues that the contemporary aid sector must reckon with its past if it is to forge a new future.

Irish Children's Literature and the Poetics of Memory Rebecca Long 2021-03-25 Focusing on the mythological narratives that influence Irish children's literature, this book examines the connections between landscape, time and identity, positing that myth and the language of myth offer authors and readers the opportunity to engage with Ireland's culture and heritage. It explores the recurring patterns of Irish mythological narratives that influence literature produced for children in Ireland between the nineteenth and the twenty-first centuries. A selection of children's books published between 1892, when there was an escalation of the cultural pursuit of Irish independence and 2016, which marked the centenary of the Easter 1916 rebellion against English rule, are discussed with the aim of demonstrating the development of a pattern of retrieving, re-telling, remembering and re-imagining myths in Irish children's literature. In doing so, it examines the reciprocity that exists between imagination, memory, and childhood experiences in this body of work.

The Children of Eternity Kenneth Zeigler 2012-06-19 *Adventures in Heaven* What happens to those who were not "left behind"? What is Heaven like for those who call it home? Christopher looked up in alarm as a shattered dagger, its cloaking device destroyed, plunged toward the demon ranks not far away. He focused all of his Holy Spirit born power upon the battered ship. It nosed up and was carried as if in a child's hand to another part of the valley where it gently touched down. He was relieved to see

the pilot and the navigator escape from the craft and safely reach an advancing column of the Monrovia military. -Children of Eternity Christopher, Jerry, Jonathan, and Lilly are caught up in the War in Heaven and find themselves coming of age as they battle to rescue more than 300 citizens of Heaven captured by Satan. In the process, they discover the faith and power within themselves. Then they must face off against the master of lies himself to rescue a lost soul from her terrible torments in Hell. From the beauty of Heaven's Crystal Sea to the darkness of Hell's Sea of Fire, these brave young people stand between life and death to battle not only the dark angels but their haunting pasts as well. This is the fourth book in the bestselling Tears of Heaven series. Heaven and Hell first told the story of the journey of Chris and Serena Davis; then The War in Heaven chronicled Abaddon the Destroyer; and Rise of the Beast featured Hell on Earth as a pseudo faith in world unity and peace brought darkness worldwide.

Children in the International Political Economy G. Kent 1995-09-13 The first line of responsibility for children lies with their parents, but what if the parents fail to look after their children? Who else is involved, and what should they do? Children in the International Political Economy examines the moral responsibilities of different individuals and agencies towards children and argues that some responsibilities should be codified as concrete legal duties. If all else fails, children must look to the international community for help. Thus international agencies should recognize specific obligations to look after the well-being of children around the world.

Discourse, Dialogue and Technology Enhanced Learning Rachel Pilkington 2015-11-19 *Discourse, Dialogue and Technology Enhanced Learning* is invaluable to all those wanting to explore how dialogic processes work and how we facilitate them. Dialogue is an

important learning tool and it is by understanding how language affects us and how we use language to encourage, empathise, inquire, argue and persuade that we come closer to understanding processes of change in ourselves and our society. Most researchers in Education will find themselves interpreting some form of data in the form of words; whether these words be explanations, conversations, narrations, reflections, debates or interviews and whether they are conducted through digital media or face-to-face. Discourse, textual or spoken, is therefore central to researching education. Each chapter focuses on the ways in which alternative levels of discourse analysis provide tools for the researcher, enabling insights into the way language works in learning, teaching practice and wider society. Drawing on the author's own 'DISCOUNT' discourse analysis coding scheme and including a wide range of dialogue examples, this book covers: *Why Dialogue? The Role of Dialogue in Education. Debate: Learning to Argue and Arguing to Learn Towards Meaning-Making: Inquiry, Narrative and Experience The Role of the Significant Other: Facilitation, Scaffolding and Mediation Inclusion, Collaboration and Community Media, Mode and Digital Literacy Researching Voices and Texts Discourse, Dialogue and Technology Enhanced Learning* will be an essential resource for all students, educators and educational researchers who have an interest in the role of discourse in educational contexts.

De vijfde aanwijzing John Darnielle 2015-01-10 Seans gezicht raakte door een ongeluk in zijn jeugd zwaar verminkt. Tijdens zijn lange revalidatie bedacht hij een ingenieuze game, die door aanwijzingen van hem via de post wordt gespeeld. De spelers sturen steeds per brief hun keuze uit Seans vier aanwijzingen. Als je strategisch kiest, blijf je leven in het spel en kun je het verborgen bolwerk in Seans fantasiewereld bereiken. Twee pubers zijn er echter van overtuigd dat Seans verbeelding geen fantasie maar werkelijkheid is en trekken eropuit. Ze weten niet dat Sean door zijn misvorming de echte wereld nooit heeft gezien. Pas als ze zijn vier aanwijzingen negeren en een vijfde aanwijzing aan Sean sturen, beseft hij waar ze mee bezig zijn. In dit weergaloze debuut stelt Darnielle zijn stijl ten dienste van het verhaal. Trefzeker laat hij zien hoe de onzekerheid van pubers vreselijke gevolgen kan hebben.

Beginning Writers in the Zone of Proximal Development Elizabeth Petrick-Steward 2012-10-12 How do young children bridge the gap between "writing" a story with pictures and writing with words? How children learn to use written words to tell a story is a topic important to both cognitive development and early literacy instruction. Using the theoretical framework developed by Vygotsky, the behavior of a group of prekindergarten children as they author two consecutive pieces of writing is analyzed. The children tell their stories at first with spoken words and pictures. As they discuss their work-in-progress in public conferences, they discover how to build on and combine existing skills to produce a new skill -- telling stories with written words. Current descriptive and theoretical perspectives on beginning writing are presented in this volume, with a particular focus on Vygotsky's concept of the zone of proximal development, a period of sensitivity in which learning advances. The proposed mechanism of change is verbal mediation -- talk among peers and teachers as they discuss work-in-progress -- which moves the children through the zone of proximal development. An open, whole-language approach to literacy instruction makes the classroom in this book an ideal arena in which to observe verbal mediation in operation. Children are free to question, criticize and argue; and in the process they collectively advance their developing ability to use written language. The work is unique in that the rich and comprehensive data record is reproduced in its entirety. More than 400 illustrations of the children's products -- two "books" apiece, pictured before and after the children's revisions -- are included, along with transcripts of the conferences about each of the pages, permitting direct observation of the effects of verbal mediation. This dynamic study documents change during a period of time when specific learning is occurring, and provides strong support for the value and power of Vygotsky's theoretical framework.
