De ontluistering van Amerika George Packer 2014-05-23 Hoe laat je zien wat er in een land gebeurt? George Packer ging praten met Amerikanen op alle geledingen van de samenleving omdat hij wilde weten wat de crisis nou echt betekent. Dus sprak hij met fabrieksarbeider Tammy Thomas, een onvermoebaar ondernemer Dean Price en Silicon Valley-wonderkind Peter Thiel. Hij vertelt het verhaal van een conservatieve journalist en van een wereldvermaarde rapper met wie gaat het goed, met wie slecht? Het resultaat is een portret van een verscheurd land. De ontluistering van Amerika is dertig jaar recente geschiedenis die leest als een road novel. Packer registreert slechts, hij oordeelt niet. Zijn onderneming is monumentaal en wordt op grootse wijze. De ontluistering van Amerika is een authentiek, poëtisch, warm en pijnlijk raak portret van een uitzonderlijk land.

On the Other Side of Chaos **Ellen Van Vechten** 2018-12-04 Based in part on her own family's journey, Ellen Van Vechten explains the science of addiction, the theory of treatment, and the twelve-step model of recovery, providing sensible information and tips for reasoned action in supporting a loved one while fostering personal growth and recovery. Powerlessness over another's addiction has a caustic effect on the family. Too often partners equate "letting go" with "giving up." While acceptance of a lack of control is essential to coping with the disease within the family, there is nothing passive about supporting a partner or child in their journey to recovery. This concept is the foundation of Van Vechten's original approach to empower individuals with knowledge, which when coupled with acceptance allows any family dealing with active addiction to make thoughtful and reasoned decisions to facilitate the recovery of both their loved ones and themselves.

The Praeger International Collection on Addictions [4 volumes] Angela E. Browne-Miller Ph.D. 2009-04-30 Only the very rare among us are completely unscathed by the effects of addiction - our own, that of a family member, friend, or coworker. Even the addictions of strangers - from the drug addict, to gambling, food, spending, or violence-addicted people - may subject us to dangers, threaten our well-being, and drain money from our pockets. Recent national estimates in just the US show that substance abuse and addiction alone cost taxpayers a total of nearly \$500 billion annually. In these volumes, experts from around the world present the newest issues, research, and insights into addictions of all kinds. Led by Angela E. Miller, Director of the Metaxis Compulsive and Habitual Behaviors Institute in California, this team of contributors includes scholars and practitioners from the United States, Canada, the United Kingdom, Sweden, Thailand, Africa, and Russia. Topics range from drug addiction among male, female, teen, and aging populations, and among White, Hispanic, Black, Asian, Native American, and other groups, using liquor, cocaine, methamphetamine, khat, and/or other lesser known drugs, to behavioral addictions including online gaming, excessive buying, and eating disorders. Chapters also address issues including addiction as a public health problem and the politics of drug treatment policies. Treatment methods for addictions, from evidence-based to holistic approaches are addressed, as are spiritual, psychological, and cross-cultural issues involved. The experts behind these chapters include those from the University of California, Berkeley, Johns Hopkins School of Medicine, and Purdue University, to McGill University, Nottingham Trent University, and the All India Institute of Medical Sciences.
